

TECHNICAL DATASHEET

**STALOC CERAMIC COMPOUND**

SQ-1200

**PRODUCT DESCRIPTION**

STALOC ceramic compound is a special lubricant for extreme requirements. It's excellent adhesion, temperature-resistance and ability to withstand extreme loads makes it suitable for demanding lubrication applications. It is used to prevent corrosion and wear with bolts, fits, etc.

Moreover, the product reduces and eliminates operating noises.

The product is especially recommended for use in maintenance and repair operations, and additionally as corrosion inhibitor for all moving automotive components and parts. The product is ABS-system compatible. Shake well before use!

**APPLICATION**

Recommended application – further information can be found in the material safety data sheet

Spray agent from a distance of 20-30 cm onto the surface.

**TECHNICAL PROPERTIES**

ATTRIBUTE	UNIT	SPECIFICATION
colour		off-white
temperature resistance	°C	-40°C to +1.400°C

**SAFETY INFORMATION**

Please send your request for the latest version of the material safety data sheet (MSDS).

**PACKAGING / VOLUME**

400 ml 520 3e / 12 pcs. per box
