

TECHNICAL DATASHEET

STALOC CMD POWERCUT

SQ-685

PRODUCT DESCRIPTION

STALOC CMD POWERCUT is an off-white, foam-building high-performance lubricant with excellent adhesion characteristics on all metallic surfaces. It is used for all mechanical operations (drilling, milling, turning, cutting, broaching, etc.) and reduces the risk of tool break. Perfectly suited for fine threads and stainless steel.

Its excellent adhesion to surfaces and tools provides for a good lubrication effect, even when rotating speeds of tools are high. The product is free of mineral oils, sulfur and other aggressive additives. Therefore, the product can be mixed with water-based cooling liquids.

STALOC CMD POWERCUT can be used on all metals, alloy and non-alloy steel, castings, copper, all CrNi-alloys and many other materials.

APPLICATION

Recommended application – further information can be found in the material safety data sheet.

Test before use. Clean parts before use for an optimized effect of the agent. Shake well before use. Apply agent from a short distance.

SAFETY INFORMATION

Please send your request for the latest version of the material safety data sheet (MSDS).

PACKAGING / VOLUME

400 ml 520 3e / 12 pcs. per box
